

## **BAB V**

### **PENUTUP**

#### **1. Kesimpulan**

Adapun kesimpulan yang bisa ditarik dari sistem penerimaan siswa baru di SD Negeri 5 Sempan ini antara lain :

- a. Dengan adanya sistem penerimaan siswa baru secara komputerisasi pengolah data, penyajian informasi akan lebih cepat, akurat serta keamanan data akan lebih terjamin karena tempat atau media penyimpanan lebih terjaga.
- b. Tingkat kesalahan pada penggunaan sistem manual lebih besar dibanding dengan menggunakan sistem yang sudah terkomputerisasi seperti dalam proses perhitungan.

#### **2. Saran**

Adapun beberapa hal yang dapat disampaikan sebagai bahan masukan antara lain :

- a. Pemakai atau user harus memiliki penguasaan dan kemampuan dalam bidang komputer baik hardware maupun software yang baik, yang dibutuhkan dalam sistem komputerisasi penerimaan siswa baru. Dan jika perlu dilakukan pelatihan atau training khusus untuk menjalankan system yang baru ini, baik dalam peningkatan kemampuan, penguasaan hardware dan software maupun dalam pemahaman sistem komputerisasi penerimaan siswa baru ini.

- b. Untuk menjaga dari hal-hal yang tidak diinginkan, seperti hilang data. Sebaiknya sistem komputerisasi penerimaan siswa baru dipelihara secara rutin dan hanya karyawan atau bagian penerimaan siswa baru saja yang dapat mengakses sistem tersebut.
- c. Melakukan back up data secara rutin sebagai cadangan dari master data dan media penyimpanan harus terjamin seperti dalam Flash disk atau harddisk atau CD ReWritable.
- d. Pastikan komputer bebas dari virus, kemudian gunakan atau install software anti virus yang terbaru dalam sistem penerimaan siswa baru untuk mendeteksi sewaktu-waktu ada yang memasukkan data dari luar computer itu sendiri.
- e. Gunakan password dalam komputer dan kata sandi dan hanya karyawan tertentu saja yang boleh tahu.
